MANURE EXCHANGE PROGRAM

FROM YOUR NEIGHBOR'S FARM, TO OUR FARM, TO YOUR GARDEN!

Country Garden Farms utilizes local resources to transform one person's garbage into another's garden necessity! We are a proud member of the US Composting Council and work hard to provide you with the best quality compost at a competitive price.

Available in Anchorage and the Mat-Su Valley, our manure exchange program links horse owners with Alaskan farmers and gardeners who need their valuable compost. Horse owners dispose of their waste using our bulk bag system: just set up the lightweight bag holder on a pallet, hang a sturdy one cubic yard bag from the rails, and fill 'er up.

When the bag is full, tie the top, move the holder to the next bag, and call Country Gardens for a quick pick-up. Grass clippings, brush trimmings, and other organic materials from our farm are added to the manure and carefully composted, creating a nutrient-rich result.

Every bag of Country Garden Farms compost helps to improve water quality, reduce our dependence on Outside fertilizer for Alaska Grown crops, and prevent the spread of invasive species.
